Pulp and Paper Industry

REVERSE ENGINEERING SOLUTIONS

PumpenXpert
INDUSTRIAL SPARE PARTS

Our solutions for paper production and pulp production

We supply high-quality spare parts for centrifugal process pumps widely used in the paper industry, including Sulzer, Andritz, and Scanpump. Manufactured with precision equivalent to the originals, our parts ensure long-lasting and trouble-free operation of your systems.

EQUIVALENT PUMP

PumpenXpert - Sulzer Pump Spare Parts and Complete Equivalent Pump Solutions

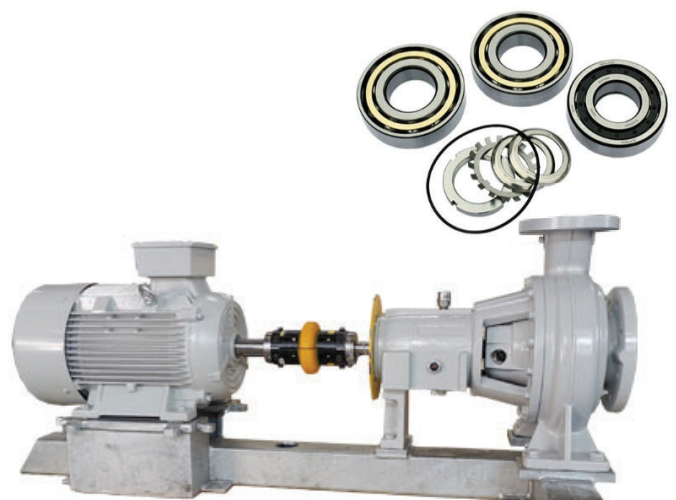

PumpenXpert offers high-quality equivalent solutions for Sulzer pumps and spare parts, as well as complete pump systems. Our products are 100% compatible with original parts, providing the most efficient and cost-effective service for your business needs. By providing both spare parts and complete pump solutions, we ensure uninterrupted operation and long-lasting reliability.

Features :

- 100% Compatibility: Our equivalent parts work perfectly with Sulzer original parts.
- High Performance: Provides the same efficiency and reliability for long-term use.
- Complete Pump Solutions: Complete pump systems can be provided along with spare parts.
- Cost-Effective: Offers cost advantages compared to original parts.
- Quality and Assurance: Durable and reliable products that meet high-quality standards.
- Operational Efficiency: Supports your business operations in a seamless and efficient manner.

Sulzer Service Kits

Pumpenxpert offers high-quality service kits for Sulzer pumps, which are widely used especially in the paper industry.

Pumpenxpert – Spare Parts for ABS Scanpump

Pumpenxpert supplies high-quality spare parts fully compatible with Abscanpump pumps, widely used in various industrial applications including the pulp and paper industry. All spare parts are manufactured with precision to ensure reliable performance, long service life, and seamless interchangeability with original components.

Available Spare Parts Include:

- Impellers and wear plates
- Mechanical seals and seal kits
- Bearings and bearing housings
- Shaft sleeves and bushings
- Gaskets, O-rings, and complete repair kits
- Couplings and other rotating equipment parts

Why Choose Pumpenxpert:

- OEM-compatible spare parts at competitive prices
- German engineering and quality assurance
- Short lead times and fast delivery within Europe
- Custom solutions available upon request
- Technical documentation and support available

Pumpenxpert – Progressive Cavity Pumps in the Paper Industry

Positive displacement pumps are widely used in the paper industry, especially for handling viscous or high-density fluids such as starch solutions, chemicals, coating compounds, lime milk, and adhesives. These pumps deliver a constant volume, making them ideal for processes requiring precise flow control.

Available Spare Parts Include:

- Pump housing
- Rotor
- Stator
- Coupling rod
- Gaskets, O-rings, and complete repair kits
- Couplings and other rotating equipment parts

Why Choose Pumpenxpert:

- OEM-compatible spare parts at competitive prices
- German engineering and quality assurance
- Short lead times and fast delivery within Europe
- Custom solutions available upon request
- Technical documentation and support available

PumpenXpert - SealXpert Mechanical Seals for the Pulp and Paper Industry

SealXpert mechanical seals are specifically designed to meet the stringent demands of the pulp and paper industry.

Robust and reliable sealing solutions for pumps and rotary equipment, to drive minimizing downtime and reduce maintenance costs.

Seals are engineered to handle harsh processes such as high-consistency pulp, chemical and recycled paper production, Seals designed for prolonged service life, enhancing operational efficiency, driving productivity.

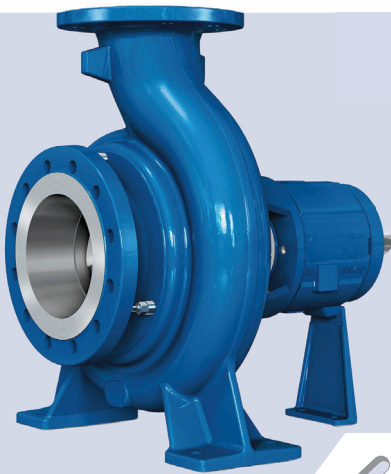

Mechanical Seal Repair

Reliable, Cost-Effective and Fast Repair Solutions, At SealXpert, we not only provide high-performance new mechanical seals, but also offer professional repair and refurbishment services for worn or damaged mechanical seals used in industrial applications—especially in the pulp and paper industry.

Why Choose SealXpert Repair?

- Up to 50% cost savings compared to new seal replacement
- OEM and custom parts available from European & Asian production
- All repairs conform to EN 12756 / DIN 24960 standards
- Guaranteed compatibility with SealXpert's own seal designs
- 1-year limited service warranty on repaired units

Packing for pumps

PumpenXpert - SealXpert

The packed gland is a reliable fluid sealing device that is simple to install and maintain. Not only is it highly versatile, but also remarkably cost effective in both plant downtime and materials - especially when compared to complex alternatives.
